Thiago Lucas Silveira Costa

Backend Developer

Ipatinga-MG, Brazil | +55 (31) 99616-3818 | thiago10lscbf@gmail.com | Linkedin: linkedin.com/in/thiago-costa-dev
Github: github.com/ThiagoCosta01 | Porfolio: thiagocosta01.github.io

PROFESSIONAL SUMMARY

Backend Developer with 4+ years of experience in enterprise software development, infrastructure administration, and process automation. Experienced throughout the entire software development lifecycle, from requirements gathering and solution architecture to development, CI/CD implementation, deployment, and production support.

Strong background in Java/Spring Boot, Node.js, Docker, Linux and Microsoft environments, as well as enterprise systems integration in mission-critical environments. Fluent English (C2 Proficient).

EXPERIENCE

IT Support Technician

May 2026 – Present

Nexa Tecnologia | Remote

- Identity and access management in enterprise environments using Active Directory, Microsoft 365, and SAP.
- Remote technical support for end users, troubleshooting issues related to systems, authentication, permissions, workstations, and business applications.
- Administration of accounts, groups, permissions, and access policies following security and governance procedures.
- Incident management and ticket resolution through service desk platforms, ensuring SLA compliance and service quality.

Backend Developer & Infrastructure

Feb 2024 – May 2026

Icone – Inoue Consultoria e Engenharia | Ipatinga, MG. Brazil

- Designed and developed internal systems from scratch for a 20+ employee engineering company, covering the full lifecycle: requirements gathering, backend development (Java/Spring Boot, Node.js), frontend development (Angular, React, Swing, WPF/C#), CI/CD with GitHub Actions, and Docker container deployments.
- Reduced manual processes through automation using REST APIs, integrations, and scripting, improving team operational efficiency.
- Administered full corporate environments, including Microsoft 365, Keycloak/SSO, Azure AD, Linux physical and virtualized servers (VMware), networking, and firewall management.
- Supported onboarding of new employees and contributed to demand management structure for the team.

Key Projects

SCI – Enterprise Document Management System (GED) - Maintained and enhanced a corporate document management platform developed in C# and WPF, responsible for document storage, versioning, and traceability.

Cronos Time Tracking System - Developed a productivity and time-monitoring platform using Java (Spring Boot) and WPF.

Corporate Website - Developed the company's institutional portal using Angular, including hosting configuration and deployment automation through GitHub Actions.

Single Sign-On (SSO) Implementation - Implemented a Keycloak-based SSO solution integrated with Active Directory, enabling centralized authentication and granular access control.

IT Support Freelancer
Oct 2023 – Present

3AM IT Services | Vale do Aço, MG, Brazil

- Provided technical support to regional clients, including hardware/software installation, maintenance, and troubleshooting in corporate environments.
- Deployed physical servers from scratch, including hardware assembly, OS installation, and configuration.
- Diagnosed network infrastructure issues and proposed improvements.

IT Analyst Intern
Jun 2022 – Jan 2024

Cast Group | Ipatinga, MG, Brazil

- Supported the Blast Furnace #3 renovation project at Usiminas, operating in a mission-critical industrial environment.
- Received training in SAP ABAP development and collaborated directly with SAP development teams.
- Managed materials through SAP MM while utilizing Excel for operational data organization and control.

TECHNICAL SKILLS

Backend: Java (Spring Boot), Node.js, REST APIs.
